

**Fusion 1000 Welding Helmet**

The model for those who weld on a daily basis and want a helmet that they can rely on. A variable welding cassette is included that automatically darkens instantly when welding is in progress and returns to a light setting when the welding flame is extinguished.

Fusion 1000 Welding helmets give –

- Optimal protection of the entire face, eyes, ears and neck.
- Aerodynamic design that conducts welding fumes away effectively.
- Convex outer protective glass that minimises reflection and reduces heat radiation.
- Gently rounded edges over the whole helmet.
- Lightweight – just 330gm or 430gm including the welding cassette.
- Screen area of 95 x 46.5cm.
- Easy to change protective glass without needing to remove the welding cassette.
- Comfortable head fitting with knob adjustment.
- Replaceable interior sweat band.

Zekler welding cassettes give –

- Light position of light state 4.
- Darkened position variable between light states 9, 10, 11, 12 and 13.
- Variable sensitivity adjustment to counter exterior light conditions.
- Variable delay adjustment (0.2 to 0.8 seconds) for changing from dark back to light.
- Reaction time from light to dark of 0.15ms at 23°C.
- UV and IR protected. UV15 IR14 constant.
- No batteries required as powered by solar cells.

Stock No.	Description	Price
380610006	Welding Helmet - complete	£310.00
380611004	Welding Cassette	£255.00
380612002	Outer Protective Plate	£13.90
380612010	Inner Protective Plate	£8.70
380612044	Sweatband	£5.20

**ADF500 Welding Helmet**

The model for those who weld on a less frequent basis but who still want a helmet that they can rely on. It features a variable welding cassette that darkens while welding is in progress and returns to a light position when the arc is extinguished.

ADF500 Welding helmets give –

- Optimal protection of the entire face, eyes, ears and neck.
- Aerodynamic design that conducts welding fumes away effectively.
- Lightweight - just 490gm including the welding cassette.
- Screen area of 97 x 47.5cm.
- Easy to change protective glass without needing to remove the welding cassette.
- Comfortable head fitting with knob adjustment.
- Replaceable interior sweat band.

Zekler welding cassettes give –

- Light position of light state 3.5.
- Darkened position variable between light states 9, 10, 11, 12 and 13.
- Variable sensitivity adjustment to counter exterior light conditions.
- Variable delay adjustment (0.1 to 1.0 seconds) for changing from dark back to light.
- Reaction time from light to dark of 0.25ms at 23°C.
- UV and IR protected. Up to DIN16 constant.
- No batteries required as powered by solar cells.

Stock No.	Description	Price
380615005	Welding helmet	£125.00
380611004	Welding Cassette	£255.00
380612002	Outer Protective Plate	£13.90
380612010	Inner Protective Plate	£8.70
